

Started in 1976, Jones Racing is celebrating 34 years of service in the Clermont community. We have grown by word of mouth and developed a large following of customers. And today, we continue to provide the same superior quality, experienced and dependable service that folks have come to expect.

We would like to take a moment to thank our many loyal customers for their continued support. As car technologies have evolved and become more complex over time, Jones Racing has invested in the newest diagnostic systems needed to keep up with all the technological advances. We have one of the most advanced high-tech automotive repair facilities in Central Florida with all the newest and best diagnostic equipment needed to properly trouble-shoot and service today's newer computerized car operating systems.

At Jones Racing, we continue to be more affordable and far less than what the car dealers charge for the same services. We can save you time, money and heartaches.

If you haven't used us before, we invite you to call or bring your car or truck by anytime you have a service need or question. See why many longtime area residents use us. We care and take the time to educate our customers. And we offer sensible, low cost car maintenance programs designed to get more miles out of your car and its components. We do first-class, quality work and can solve any problems you're experiencing with your car quickly and properly.
